About Me

As a Physiotherapy graduate, I discovered my passion for solving problems beyond the clinic by building digital solutions that improve people's lives. While working in healthcare, I realized many challenges could be addressed through technology, inspiring me to transition into Software Engineering. I completed an intensive Full Stack Software Engineering program, where I built and deployed applications such as a physiotherapy booking platform and a banking API. I gained hands-on experience with React, Next.js, NestJS, TypeScript, PostgreSQL, Prisma, Docker, and RESTful APIs in agile environments. I am seeking opportunities as a Full Stack or Frontend Software Engineer to build scalable, user-centered products by combining engineering skills with my healthcare perspective.

Education

RevoU | Oct 2025 - May 2026
Full Stack Software Engineering
Completed an intensive Full Stack Software Engineering bootcamp with built and deployed full-stack web applications using React, Next.js, NestJS, PostgreSQL, Prisma, Docker, Railway, and Vercel through hands-on industry projects and other several projects.

Airlangga University | Aug 2018 - Nov 2023
Bachelor, Physiotherapy | GPA: 3.45/4.00
Completed clinical internships and academic research while developing teamwork, critical thinking, leadership, and patient communication skills.

Working Experiences

Frontend Developer | OpsCtrlAug 2026 - Present
- Develop and maintain web interfaces using React.js, Next.js, and TypeScript for landing page.
- Implement reusable and responsive UI components using Tailwind CSS based on company designs.
- Collaborate with backend, design, and product teams via Git, code reviews, and pull requests.

Assistant Manager | Kasatmata IndonesiaJan 2024 - Aug 2025
- Supervised daily operations and scheduled work shifts for a team of 5 employees at a single store, ensuring smooth service and full coverage.
- Prepared weekly and monthly operational reports for managers and directors, and maintained confidential employee and operational records.
- Coordinated appointments, meetings, and staff activities; prepared meeting materials and tracked follow-ups to completion.

Supervisor | Kasatmata IndonesiaJan 2022 - Dec 2023
- Supervise a team of 4 people: work schedule, attendance, and distribution of daily tasks.
- Increase sales to over 1,400 items per month
- Boost the store's rating on Google Reviews/Maps to 5 stars.

Sales | Kasatmat IndonesiaJan 2020 - Dec 2021
- Process customer orders and accurately record daily transactions.
- Handle customer complaints through to resolution and maintain relationships with existing customers.
- Meet the monthly sales target of selling over 1000 items.

Project Experiences

Mamabear E-Commerce - Virtual Internship RevoU x Mamabear | Aug 2026 - Oct 2026

MamaBear is an e-commerce platform designed to support women throughout pregnancy, childbirth preparation, breastfeeding, and postpartum recovery by providing nutritional products, maternal care essentials, and baby care supplies. Built using Next.js for the frontend and NestJS for the backend, the platform aims to provide a convenient and user-friendly shopping experience for mothers and their babies. As a Frontend Developer, I contributed to improving the landing page and developing an AI-powered chatbot to enhance user interaction and overall user experience.

Demo Link

SHARK - Product Requirement Document Implementation | RevoU | Aug 2026 - Aug 2026

SHARK is a web development project focused on implementing product requirements into functional user interfaces based on a Product Requirement Document (PRD). The project involved translating user flows and functional specifications into responsive, reusable frontend components while ensuring consistency with the original design and product requirements. As a Frontend Developer, I contributed to developing interactive user experiences and implementing interface components that aligned with the project's functional and design specifications.

Demo Link

Kinova - Full Stack (Final Project) | RevoU | Mar 2026 - Present

Kinova is a full-stack physiotherapy booking management platform designed to connect patients with physiotherapists through online consultations, appointment scheduling, and home-visit services. Built using React, Next.js, NestJS, PostgreSQL, Prisma, Docker, and Railway, the platform provides secure authentication, role-based access control for patients, physiotherapists, and administrators, scalable RESTful APIs, optimized database queries, and responsive interfaces for desktop and mobile devices. As a Full Stack Developer, I contributed to building an end-to-end solution focused on improving operational efficiency, streamlining appointment management, and delivering an intuitive user experience.
